HOW TO ASSEMBLE YOUR TEMPLATE

Your template is printed across 4 pages (tiles A1, A2, B1, B2). Follow these steps to join them.

STEP 1 — PRINT ALL PAGES AT 100%

When your printer asks about page size, choose "Actual size" or "100%". Never choose "Fit to page" — this shrinks the template and your nail positions will be in the wrong place.

STEP 2 — CHECK THE SCALE BAR

Each page footer has a small black rectangle. Measure it with a ruler — it must be exactly 1 cm. If it is not 1 cm, reprint at 100% (no scaling).

STEP 3 — KNOW YOUR PAGE LABELS

Pages are labelled A1, A2, B1, B2 etc.

A, B ... = rows (A is the top row)

1, 2 ... = columns (1 is the left column)

Always start with A1 — the top-left page.

STEP 4 — CUT ONLY THE MARKED EDGES

Find the RED line near the right or bottom edge of each page (inside the grey shaded strip).

Cut along the red line with scissors.

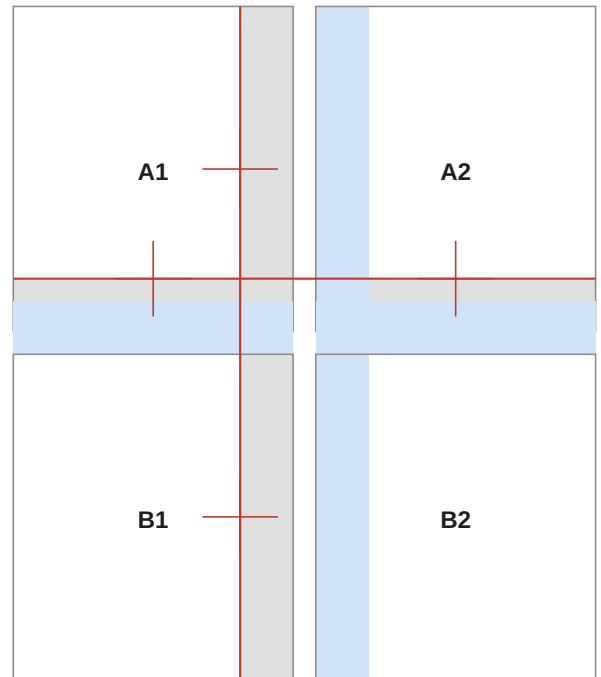

Do NOT cut the left or top edges — ever.

STEP 5 — JOIN PAGES LEFT TO RIGHT

Lay A1 flat on the table.

Pick up A2. Slide its LEFT (blue) edge UNDER the right side of A1 until the + marks line up.

When the + marks match exactly, tape from behind.

+ marks = align here (step 5)

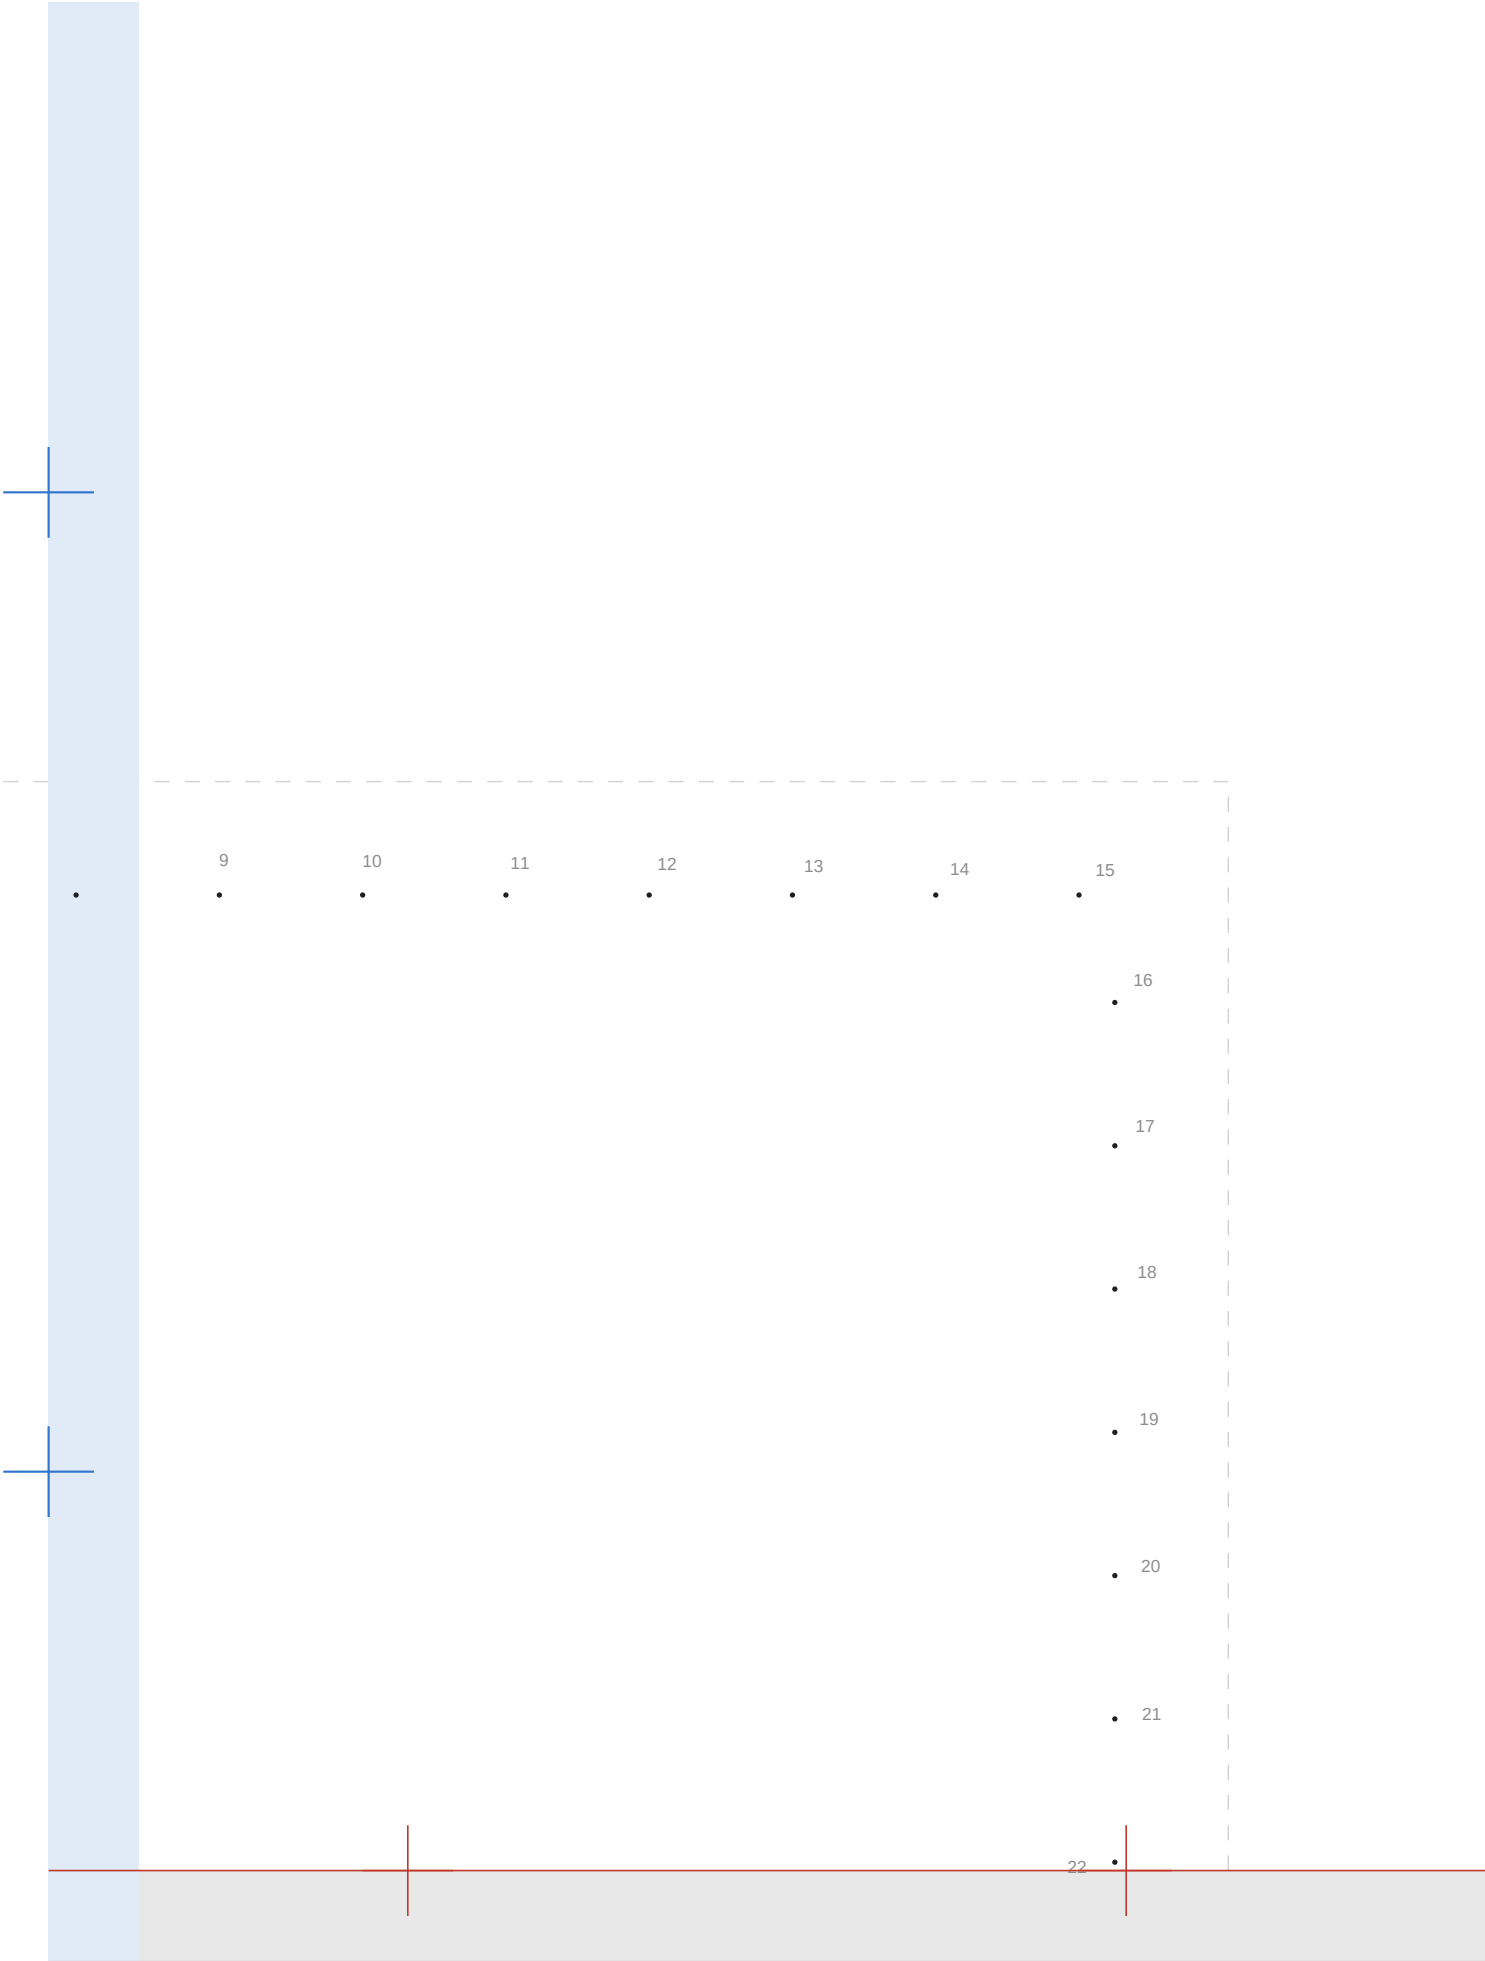

STEP 6 — ADD ROWS TOP TO BOTTOM

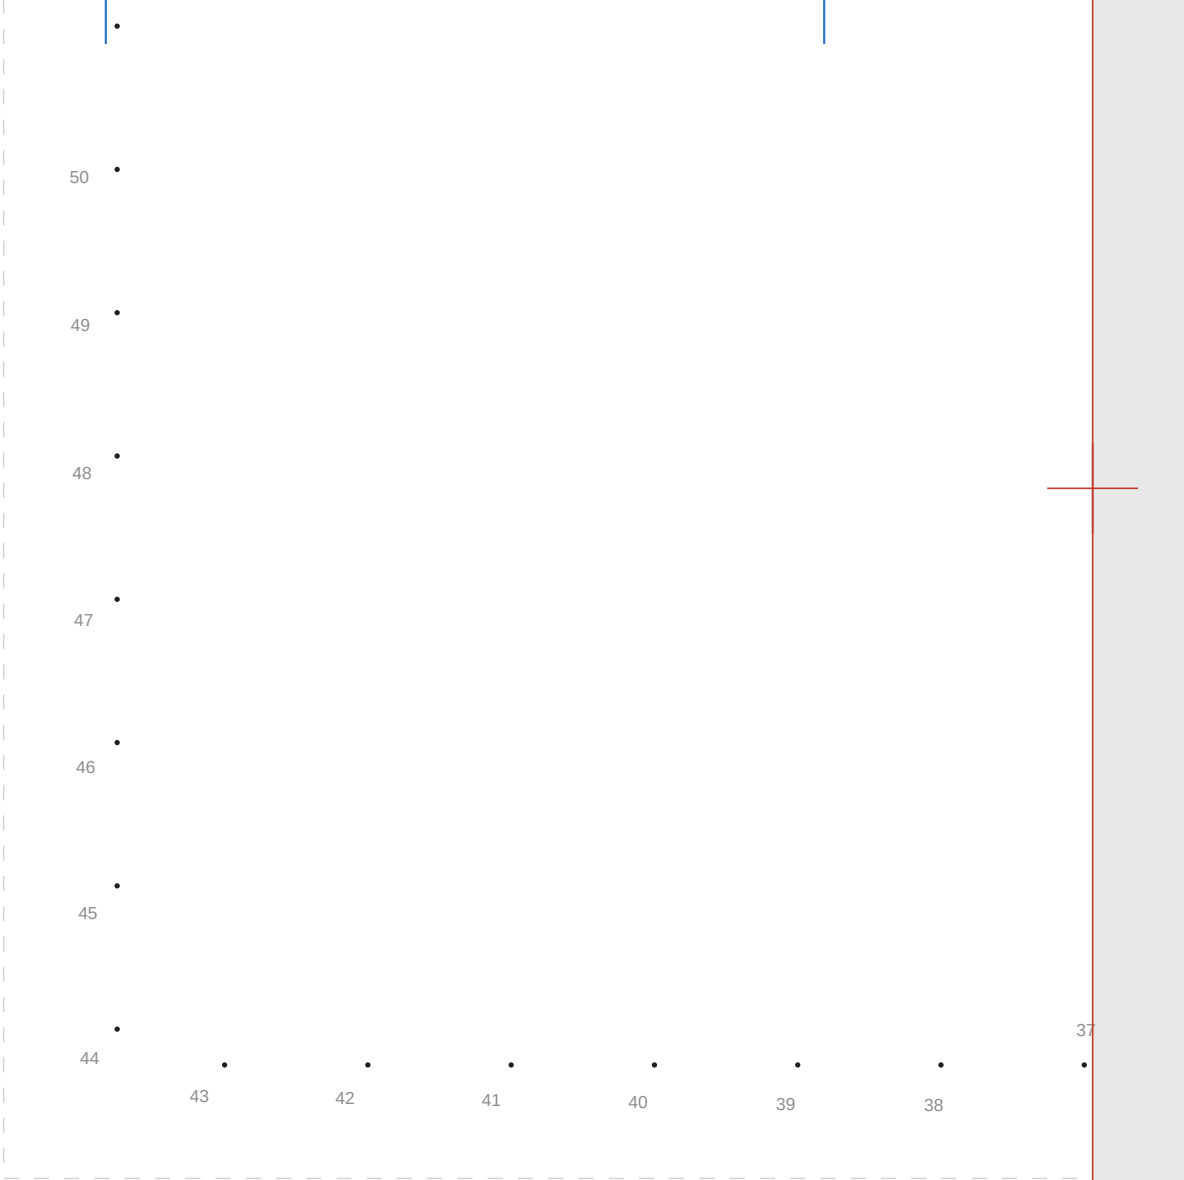

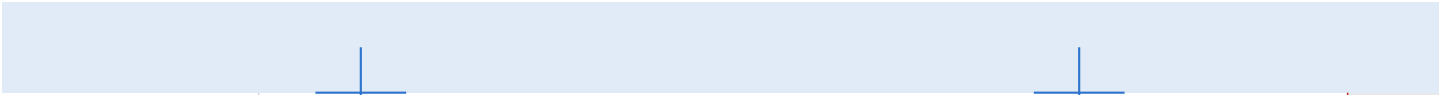

Once row A is done, pick up B1.

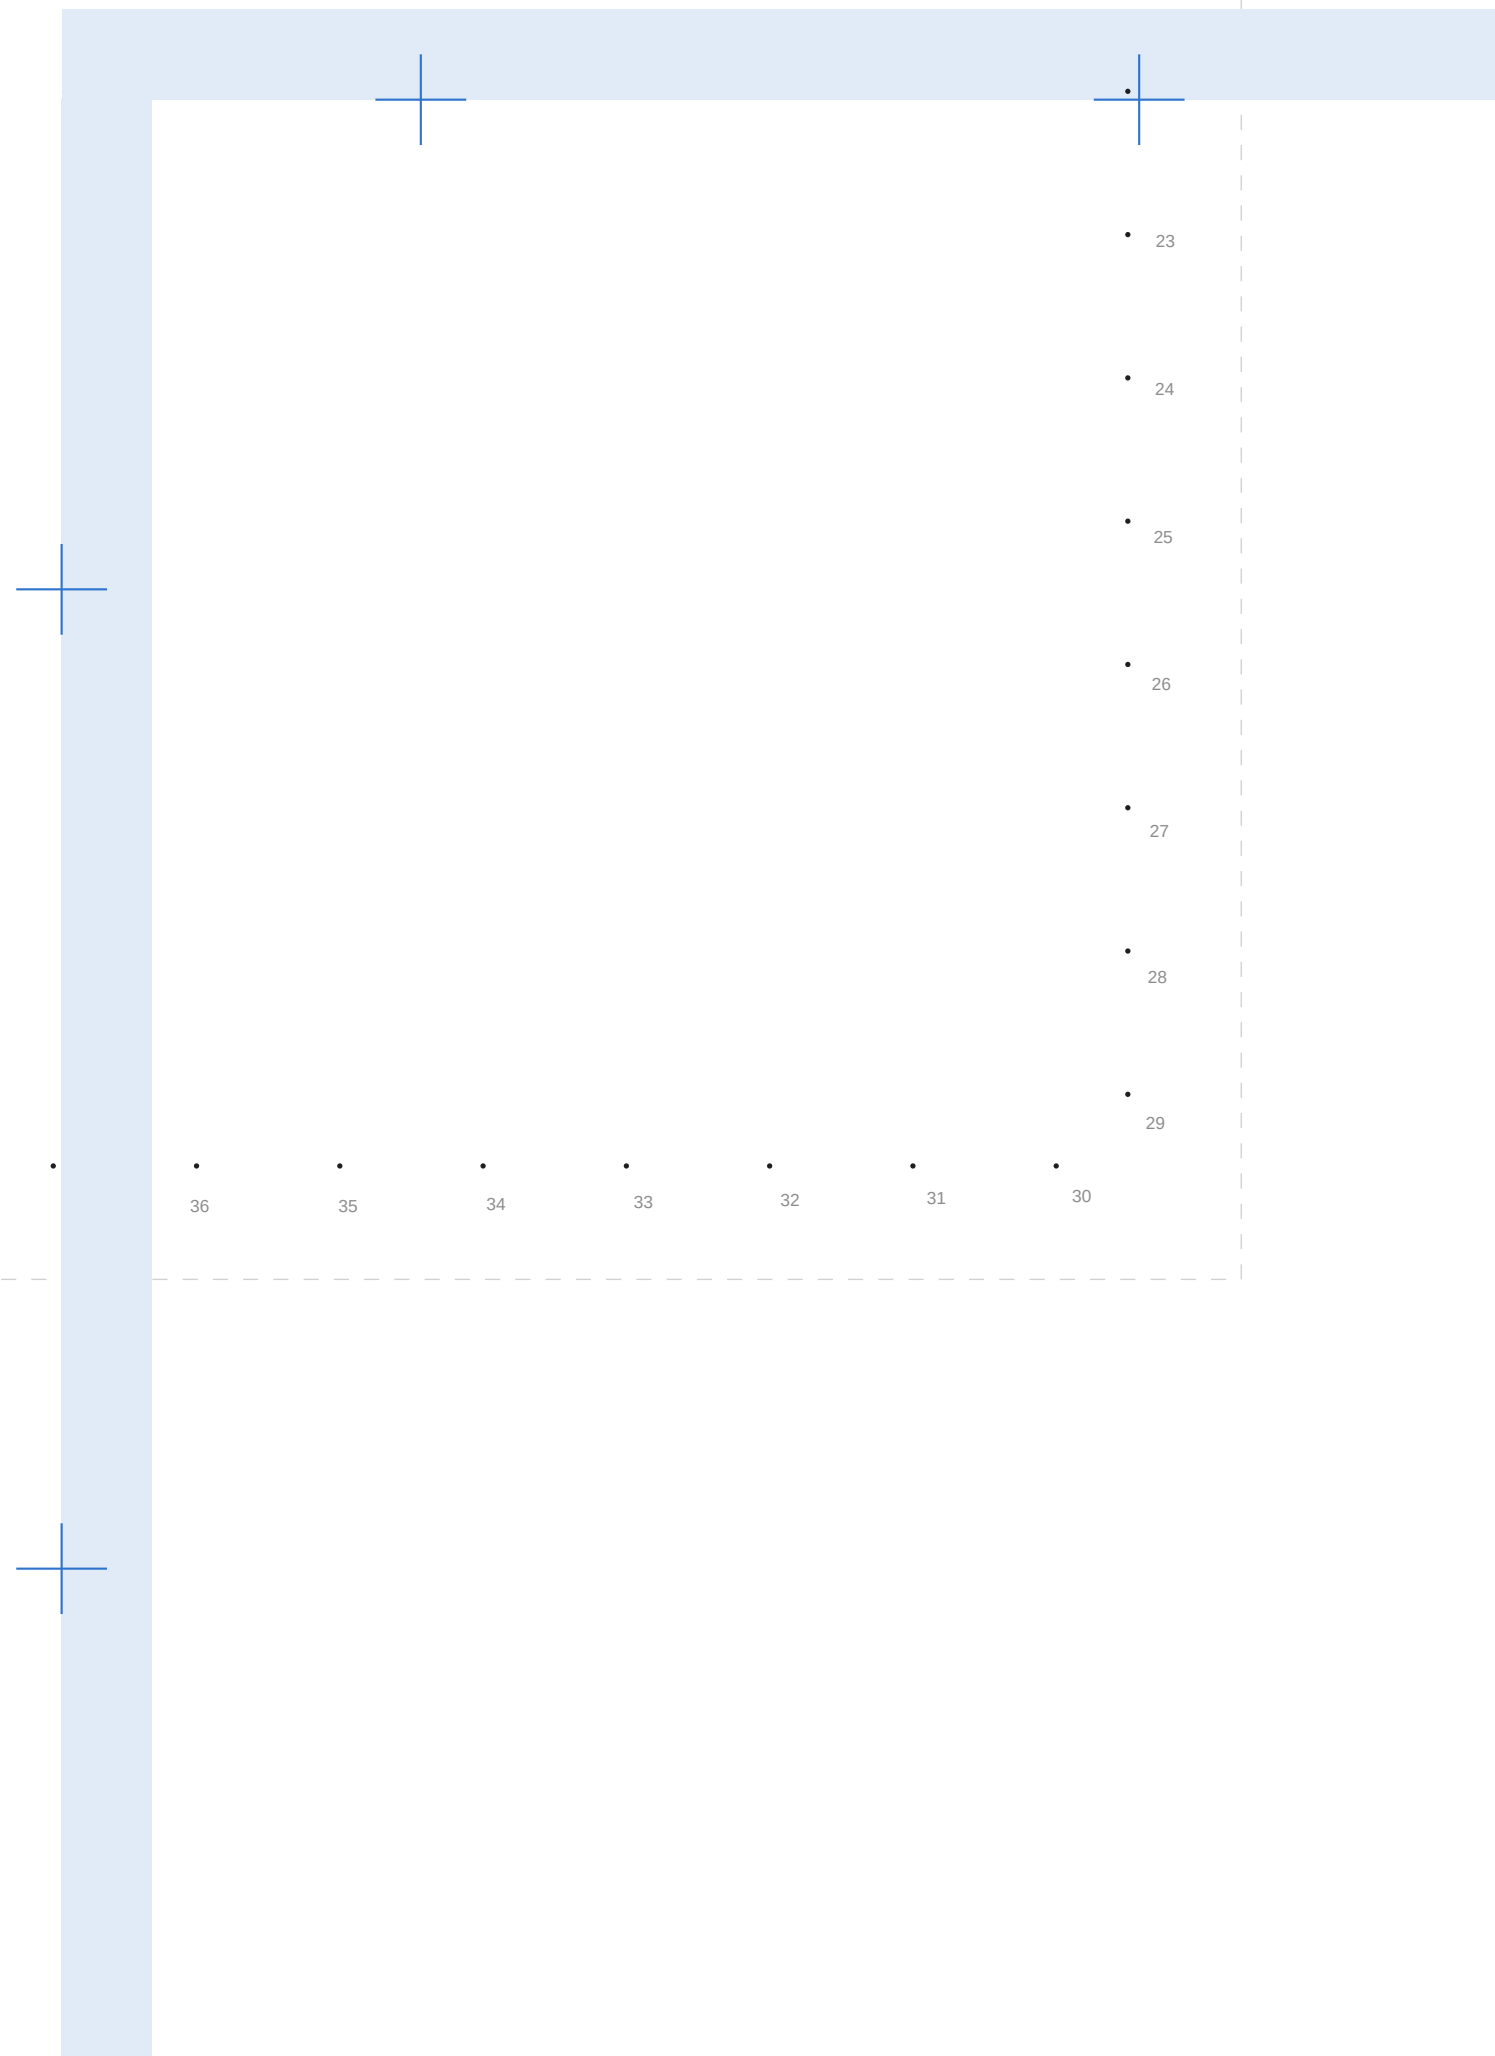

Slide its TOP (blue) edge UNDER the bottom of A1.

Match the + marks and tape from behind.

Add B2 next to B1 the same way. Repeat for all rows.

How To Build

1

Start at the listed nail

Each layer page shows the start nail — tie a knot here before you begin.

2

Follow the sequence in order

Each step shows one nail move. Work through the list exactly as shown, nail by nail.

3

Keep even tension on the thread

Thread should be snug but not so tight it bows the board.

4

Complete one full layer before stopping

Finish the entire sequence for a layer before moving to the next colour.

TIPS

- . Do not pull the thread too tight — this can warp the board
 - . Use contrasting colours to make each layer visually distinct
 - . Mark your start nail with a small piece of tape while you work
